Last Month's Actions

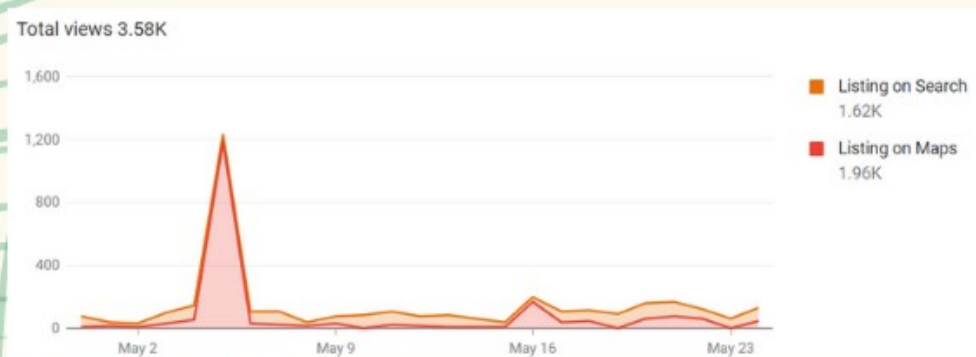

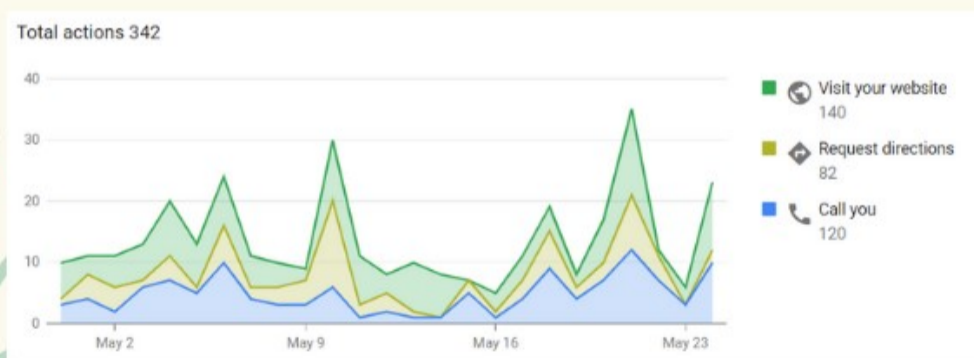

The graphs below shows how many people visited our website, placed a call or requested directions from our listing. *This graph does not show all of the people who called us or visited our website, it only tracks what was found through Google

Google Views in May: 140
Calls from Google: 120

May LAP Data:

total calls: 6
High Danger: 6
Note High Danger: 0
New to Program: 2

**The Lethality Assessment Protocol, or LAP, is a tool that helps police officers and other crisis responders to put victims in contact with us almost immediately after a domestic violence incident. Officers or responders use the lethality assessment to determine how much danger the victim is in in their current situation. If they conclude that the risk of lethality is high, the responder will call us and an advocate will speak with the victim, inform them of our services, and set up a time to call back for a more in-depth conversation.*

Volunteer Updates

- Summer 2021 internship program:
We thank our partnership with universities in the area (UW Eau Claire, UW Stout) that introduce us to intelligent students who are willing to put their knowledge to use at our agency. This year we have two interns, Sydney and Jessica, who have been working hard to start their internship and assist with our services.

Volunteer Opportunities:

- Children's Summer Camp at BRH:
We are looking for volunteers to lead activities during the day for a weeklong summer program for children using BRH services.
- Recycling and compost assistance:
We are seeking volunteers to pick up recycling and compost materials at the shelter and drop them off at the proper locations.

Donation Suggestions

- Toilet paper
- Paper Towels
- Disinfecting cleaning supplies
- 91% Rubbing Alcohol
